DETAILED ACTION

Specification

1. The disclosure is objected to under 37 CFR 1.71, as failing to describe how the claimed nail clipper functions. It is to be noted that for the purpose of this office action, the Examiner uses the latest Amendments to the Specification and the Drawings filed on 12/15/2008 to explain his position.

It is to be noted that the last sentence in the Amendments to the Specification states “a second post 122 is connected to the post 117 by a hinge 123” while the Amendments the Drawings shows the second post being designated by numeral 123 and the hinge being designated by numeral 122. For the discussion, the Examiner assumes that numeral 123 is the second post and numeral 122 is the hinge.

According the principle of leverage, the first post 117 acts as a fulcrum and the lever 118 pivots about the hinge 122. When the lever 118 is pressed down, the cutting end 113 is lifted up according the principle of leverage. This is not the intended use of the nail clipper which the press down force is supposed to bring the cutting ends (113, 114) close together to cut a nail.

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art. Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3724

3. Claims 1, 5-8, 17, 20 and 22-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claims 1, 22 and 23, it is unclear how the claimed lever, first post, second post and hinge are adapted to cause the movement of the cutting edges between a cutting position and a non-cutting position. See explanation above.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 22 and 23 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

5. Claims 1, 22 and 23 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action.
